

A Body with a Vagina

Directions: Write the name of the organ above its definition.

External

[Accessible Complex Image Description](#)

Internal

[Accessible Complex Image Description](#)

The name for all of these external reproductive organs.

The fatty tissue covering the pubic bone, above the vulva.

Inner folds of skin that cover and protect the vaginal and urinary openings.

Outer folds of skin that surround and protect the other external organs.

Urine leaves the body through this opening.

A muscular tunnel that connects the external and internal reproductive organs.

A pear-shaped organ, about the size of a fist. It's where a fertilized egg grows and develops during a pregnancy.

Almond-sized organs that make hormones and hold eggs.

Tubes that carry eggs from the ovaries to the uterus.

The end of the uterus that connects it to the vagina.

Self-Check

☐ I wrote the name of each organ by its correct definition.
