

# A Body with a Penis

**Directions:** Write the name of the organ above its definition.

[Accessible Complex Image Description](#)

►

Egg-shaped organs that make testosterone and sperm.

►

A tightly coiled tube where sperm mature.

►

This pouch makes a fluid that gives sperm energy and helps them move.

►

An organ made up of spongy tissue that fills with blood and becomes erect when a person becomes sexually excited.

►

This loose sac of skin holds the testicles and keeps them at the right temperature for making sperm.

►

The tube that carries mature sperm away from the testicles and holds them until they leave the body.

►

This gland makes a clear fluid that cleans the urethra before sperm pass through it.

►

This walnut-sized gland makes fluid that mixes with the sperm to form semen.

►

The tube that carries sperm and urine out of the body.

## Self-Check

☐ I wrote the name of each organ by its correct definition.
